

Aya Mohammad Naim Salem

Full-Stack ASP.NET Developer
Amman-Jordan, avasalem.it@gmail.com, + 962 79 5969481

PROFESSIONAL SUMMARY

Business Information Technology graduate with strong foundations in full-stack web development, database design, and information systems analysis. Experienced in building ASP.NET Core MVC applications with structured workflows, role-based authentication, and SQL Server databases. Passionate about delivering scalable technical solutions aligned with business requirements.

TECHNICAL SKILLS

Programming Languages:

C#, Java, C++, SQL

Web Technologies:

HTML, CSS, JavaScript

Frameworks & Technologies:

ASP.NET Core MVC, Entity Framework Core, ASP.NET Identity

Database & Data Management:

SQL Server, Database Design, ERD Modeling, Normalization, Microsoft Access

Tools & Platforms:

Git, Visual Studio, Microsoft Office (Word, Excel, PowerPoint)

Business & Systems Analysis:

Requirements Analysis, UML Modeling, Software Project Management, Workflow Design

UI/UX: Basic interface design, Figma, Proto.io, usability principles

PROJECTS

ProVision – Full-Stack Service Marketplace Platform (Graduation Project)

- Architected and developed a full-stack ASP.NET Core MVC web application designed to modernize the freelance service marketplace through structured automation and intelligent workflow management.
- Designed a multi-role system supporting Customers, Service Providers, Template Creators, and Admins with role-based authentication and authorization using ASP.NET Identity.
- Engineered a unique “First-Wins” service assignment mechanism to automatically match customer orders with suitable providers, reducing manual selection complexity common in traditional freelance platforms.
- Implemented a complete order lifecycle including service requests, provider offers, order assignment, admin evaluation workflows, and integrated communication processes.
- Designed and optimized relational database architecture using SQL Server, applying normalization principles and efficient entity relationships to support scalability and data integrity.
- Built dynamic UI interactions and asynchronous operations using JavaScript and AJAX to enhance user experience and system responsiveness.
- Applied business analysis and system design principles to align platform functionality with real-world service marketplace challenges.
- Technologies: ASP.NET Core MVC, C#, SQL Server, Entity Framework Core, ASP.NET Identity, JavaScript, HTML, CSS, AJAX.

Full-Stack Web Development Project

- Developed a dynamic web application using HTML, CSS, JavaScript, and PHP.
- Implemented both front-end interfaces and back-end logic for data handling and user interaction.
- Focused on responsive design and structured data management.

Data Analysis & Visualization – Power BI

- Analyzed datasets and created interactive dashboards using Microsoft Power BI.
- Transformed raw data into actionable insights through data modeling and visualization techniques.
- Designed visual reports to support decision-making.

Database Design & Normalization – Microsoft Access

- Designed a relational database with ERD modeling and normalization principles.
- Structured tables to optimize data integrity and efficiency.
- Integrated database outputs with Excel and Power BI for further analysis.

EDUCATION

Bachelor of Business Information Technology
Hashemite University, Jordan – 2025

CERTIFICATIONS & PROFESSIONAL TRAINING

ASP.NET Full-Stack Development Program – The Hope International

Completion Certificate | 240 Hours

- Completed intensive full-stack web development training focused on ASP.NET Core MVC architecture.
- Developed practical experience building database-driven web applications using C#, Entity Framework Core, and SQL Server.
- Implemented CRUD operations, authentication systems, and structured backend logic following MVC design patterns.
- Integrated front-end technologies (HTML, CSS, JavaScript) with server-side development.

VR Development Course – UNICEF

- Completed intensive training in virtual reality development using Unity and Blender.
- Developed interactive VR environments with C# scripting and 3D asset integration.
- Applied game design principles to create immersive user experiences.

Programming Foundations – Udacity

- Built foundational programming skills through project-based learning.
- Worked with HTML, CSS, and Python to develop interactive web-based applications.
- Strengthened problem-solving and structured coding practices.

AI Integration in Business – Safi Training Program

- Explored practical applications of AI in business environments and decision-making.
- Learned to align AI tools with organizational strategy to improve efficiency and innovation.
- Developed understanding of AI-driven business workflows.

LEADERSHIP & ACTIVITIES

IT Specializations Representative – Eye on the Future Program | Jordan

- Represented the Business Information Technology (BIT) specialization during the “Eye on the Future” initiative, guiding high school students on IT academic pathways and career opportunities.
- Presented technical concepts and industry insights to support informed decision-making.
- Answered academic and technical inquiries, strengthening communication between educational programs and prospective students.

Human Resources Volunteer – Mujaddidun Organization

- Supported volunteer coordination and participant onboarding within a community-focused educational initiative.

- Assisted in task assignment, team coordination, and operational support for training programs.
- Contributed to IT-related activities including website development and technical course delivery.

SOFT SKILLS

- Time management and task prioritization
- Analytical thinking and problem-solving
- Clear communication and interpersonal skills
- Ability to work independently and within cross-functional teams
- Adaptability and flexibility in dynamic environments
- Ability to perform effectively under pressure

LANGUAGES

- Arabic – Native
- English – Professional working proficiency
